

Austria has launched a EUR 17.9 million (USD 19.3m) funding call for energy storage systems with a net capacity in the range of 51 kWh to 1 MWh.

In this issue, we present several pioneering Austrian projects on heat storage technologies and report on the involvement of Austrian experts in the International Energy Agency's technology ...

Located in Fürstenfeld, in the country's southeast, the facility has 24 MWh in capacity and a maximum output of 12 MW. The successful endeavor is part of the company's ...

Which one to choose to install an energy storage system in Europe? How to choose an energy storage battery in Austria? When choosing a residential or commercial/industrial energy ...

With this flagship project, Innio and RAG Austria are taking an important step towards net-zero emissions. Working together, they're helping solve one of the central ...

Located in the city of Fürstenfeld in the southern federal state of Styria, the installation plays a fundamental role in stabilizing the power grid ...

Several C& I energy storage projects are currently underway in Austria, with 250kW/630kWh energy storage systems being implemented in various locations across the ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

Austria quadruples subsidies as demand for solar and battery energy storage systems soars, adding 218 MW PV and 200 MWh storage capacity.

Press release | Rubensdorf, 27 April 2023 Large-volume storage of hydrogen enables energy transition while maintaining security of supply. With "Underground Sun ...

Projects like Green Ammonia Linz demonstrate how large-scale hydrogen production can reshape industrial value chains. While UEST focuses on safe, long-term ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the ...

Slovenian company NGEN has switched on what it claims to be Austria's largest battery storage facility. The

Austria Industrial Energy Storage Project

project is located next a wood gas ...

Located in the city of Fürstenfeld in the southern federal state of Styria, the installation plays a fundamental role in stabilizing the power grid and reducing Austria's ...

Austria in particular has great potential with its ideal geological structures and existing modern storage capacities. This will make it possible to decouple the generation of renewable energy ...

Innovative Residential Energy Storage Project in Austria! We're proud to present our latest installation in Austria, where 12 Hicorenergy C5 batteries are connected in parallel, creating a ...
