

Can outdoor power supply be used

What is an outdoor Uninterruptible Power Supply?

An outdoor Uninterruptible Power Supply is a power solution designed for critical applications where it's essential that equipment stays running in harsh outdoor environments and significant temperature variations, where an ordinary UPS would fail. Trust TSi Power for these applications.

Is an external power supply required?

An external power supply is required for devices like printers, displays, pin pads, external DVD-ROMs, and hard drives. Unfortunately, the bus supplied power is limited to 2.5 Watts (0.5A @+5V) per port, sufficient to provide enough power to input devices, web cameras, and other low power devices.

Who can use a power supply?

The power supply can be used by anyone from the maker in their garage, to the experienced engineer prototyping new ideas. But, good quality power supplies can be quite expensive and acquiring one might leave a dent in your bank account. Are there any alternatives to using a power supply? Can you use a battery charger as a power supply?

Is a permanent power outlet necessary?

For lighting, lawn tools used on a regular basis, or power needs for outbuildings, you need a permanent power solution for safety. This can involve an outdoor outlet addition to your home's main structure, or wiring run remotely to an outbuilding.

Do I need a GFCI outlet if I run power outside?

When running power outside, a GFCI-equipped outlet is required by code in all areas exposed to moisture, such as the outdoors, and ensures safety. When adding an outdoor outlet, be sure to choose an outdoor-rated, weatherproof model with built-in, high-sensitivity GFCI.

How do I choose an outdoor outlet?

When choosing an outdoor outlet, be sure to select an outdoor-rated and weatherproof model with built-in, high-sensitivity GFCI. All exterior outlets should have spring-loaded covers to protect them from weather, pests, and most importantly, moisture.
