Will Poland have 5G in 2021?

In 2021 Plus plans to offer 5G servicesusing more than 1700 base stations in all present and former provincial capitals, as well as in many other towns and places. Thus, next year more than 11 million people will be able to enjoy the services of the fastest in Poland 5G 2600 MHz TDD network.

Will Poland establish a state-owned 5G network in the 700 MHz band?

Furthermore, Poland is also exploring a controversial law to establish a state-owned 5G network, which would be operated by a state run operator -- Exatel -- in the 700 MHz band. The 700 MHz band is problematic because it requires coordination across the eastern borders (Belarus, Russia and Ukraine), which will delay spectrum assignment.

What is the fastest 5G network in Poland?

As a confirmation of its earlier announcements, Plus continues the roll-out of the fastest 5G network. The first in Poland 5G network, using the spectrum from the 2.6 GHz TDD frequency band, was launched with the use of 100 transceivers in 7 cities in May 2020. It offers data transfer speeds of up to 600 Mbps.

Why is Poland holding up a 5G network?

However, due to the pandemic, Polish authorities suspended all administrative proceedings, and the current holdup is due to legislative issues. Furthermore, Poland is also exploring a controversial law to establish a state-owned 5G network, which would be operated by a state run operator -- Exatel -- in the 700 MHz band.
