## **Luxembourg Lithium Battery Company**

Does Lyten make lithium-sulfur batteries?

Lyten is a manufacturer of 3D graphene supermaterials used in various applications, including lithium-sulfur batteries. The company plans to begin supplying lithium-sulfur batteries and other products to commercial customers from its San Jose, California, facility in early 2024. It is pursuing expansion plans actively in both the U.S. and Europe.

Will Lyten be able to deliver lithium-sulfur batteries in 2024?

Lyten, from its facilities in San Jose, California, plans to deliver both Lithium-Sulfur batteries and lightweighted composite solutions to commercial customers by early 2024 and is actively pursuing expansion plans in the US and Europe.

Will Lyten revolutionize the future of batteries & materials?

Through their innovative "3D Graphene" technology, Lyten is on its way to revolutionize the future of batteries and materials. It's an exciting step for Luxembourg in becoming a hub for future-proof industrial projects in the field of sustainability and mobility. Many sectors will benefit from the company's advancements on their path to Net Zero."

What is Lyten doing in Luxembourg?

Lyten is also exploring opportunities to establish research and development capabilities in Luxembourg, including infrastructure to support collaboration with European customers on disruptive applications utilizing Lyten's 3D Graphene platform.

What will Luxembourg do with a 'fit for 55' Capital?

This capital will be used to scale production and bring products such as lithium-sulfur batteries to market. Luxembourg has set ambitious climate targets under Fit for 55, aiming to reduce emissions by 55 percent from 2005 levels by 2030, as required by law.

Lyten, from its facilities in San Jose, California, plans to deliver both Lithium-Sulfur batteries and lightweighted composite solutions to commercial customers by early 2024 and is ...
