

New Energy Station Business License

Do you need a business license for a gas station?

Requirements for a general business license for a gas station can vary depending on the location and jurisdiction. In most cases, a general business license is required to operate a gas station. Additionally, there may be other permits and licenses required, such as environmental permits, fuel storage permits, and fire safety permits.

What do I need to know before installing an EV charging station?

Before installation begins, consult with your local permitting authorities to understand zoning laws, building codes, and specific requirements needed for EV charging stations in your area. Beyond the city department, you may have to consult with a local utility company. Each AHJ will have its own requirements for:

What licenses do you need to start a business?

Federal regulations, licenses, and permits associated with starting your business include doing business as (DBA), health licenses and permits from the Occupational Safety and Health Administration (OSHA), trademarks, copyrights, patents, and other intellectual properties, as well as industry-specific licenses and permits.

Do you need an EVITP certification to install a charging station?

Some jurisdictions require that at least one member of the installation team be EVITP-certified. Additionally, charging station manufacturers, like Tesla, may have their own training and certification programs. Consult with your local building department to pinpoint which certifications -- if any -- are required.

How do EV charging stations make money?

Advertising: Offering advertising space at your charging station can generate ad revenue. Retail partnerships: Boost traffic and sales for nearby stores by partnering with them for certain deals or incentives while a car charges. Utilization rate: The more an EV charger is used, the more profits you generate.

Where can I install a fast charging station?

With Charge Ahead Colorado, that state offers grants for the installation of Level 2 and Level 3 fast charging stations in public and private locations. Be sure to check for funding opportunities in your state. A great starting point in Canada is the Zero Emission Vehicle Infrastructure Program.
