

New Zealand outdoor power supply applicable equipment

What are the requirements for external power supplies in New Zealand?

External power supplies must comply with Minimum Energy Performance Standards (MEPS). Find out more about these requirements and how to meet them in New Zealand. Importers, manufacturers, and retailers of regulated products must meet the requirements of the Energy Efficiency (Energy Using Products) Regulations.

Can a 240 volt power supply work in New Zealand?

If you come from a country with a 100 - 120 V supply, first check if any of your equipment can be switched to 240 V operation. If it cannot, it will need an electrical transformer to work in New Zealand. This is an expensive solution and you are probably best to sell the equipment before you leave and replace it when you get to New Zealand.

What is the electricity supply in New Zealand?

The New Zealand electricity supply is 240 volts, 50 hertz. Your electrical equipment should work here if you come from The UK, continental Europe, South Africa, South Korea, India, China, Russia or Malaysia. Be aware that electrical devices in New Zealand are rated for a maximum of 10 amps.
