Only 6 left in stock - order soon. [High efficiency conversion]: The inverter provides 12V 24V 48V 60V DC to 110/120V 220V/230V AC pure sine wave technology, with high conversion efficiency (>90%), low no-load loss, and more energy saving. [Pure Sine Wave Inverter]: Pure sine wave inverter provides true 3000W continuous power and 6000W peak power.

Why do you need a sine wave inverter?

Most appliances in your home use AC power, so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level. A pure sine wave inverter also saves you money, as it's much more efficient than the older, jagged wave inverters.

How does a sine inverter work?

A sine inverter takes the DC output of your solar array, converts it to AC, and does so in a way which replicates as closely as possible the pure sine wave of grid power alternating current. Moreover, pure sine wave inverters amplify the converted current to differing strengths of wattage and voltage.

Do you need a sine wave inverter for solar panels?

You need a pure sine wave inverterif you plan to install solar panels on your roof or RV. Most appliances in your home use AC power,so you need it to convert the DC power that solar panels produce to AC power. It also brings up the voltage to the grid level.

What is the best sine wave inverter?

This 600 watt pure sine wave inverter from GoWISE is one of the more affordable inverters on the market, and designed for use with smaller appliances. With a one year warranty, and the versatility afforded by its 3 AC output sockets (2 regular, 1 USB), it looks to be a pretty promising little unit.

What is a modified sine wave inverter?

Contrary to pure sine wave inverters, modified sine wave inverters only attempt to mimic a sine wave, which can result in regular and bad disruptions to the grid and to your experience. On the other hand, pure sine wave inverters actually produce sine waves, which minimise disruptions, and maximise efficiency.
