

Solar Tracking System Market

What is the global solar tracker market size?

The global solar tracker market size was valued at USD 4.41 billion in 2022, expanding at a compound annual growth rate (CAGR) of 26.2% from 2023 to 2030.

What is the value of the solar trackers market?

The solar trackers market was valued at US\$3.2 billion in 2022 and further surpassed a value of US\$3.5 billion in 2023. The idea of solar trackers began to gain attention as a means to surge the energy output of solar panels by tracking the movement of the sun.

Is the solar tracker market a competitive market?

The solar tracker market is price competitive, so the solar tracker manufacturers have to be operationally efficient and extremely strategic to be successful. The market in Europe is expected to witness substantial growth over the forecast period, owing to the recent increase in the Feed-in Tariff (FIT) rates especially in Germany.

Which solar tracker segment has the fastest growing market share?

The single-axis solar tracker segment is the largest and fastest-growing global solar tracker market, with the highest market share. This is because single-axis solar trackers are frequently chosen for large-scale utility projects and commercial installations.

How big is China solar trackers market?

The China solar trackers market is expected to reach US\$1.4 billion by 2033, growing at a CAGR of 7.4%.

Why is solar tracker market growing?

Rising use of solar power as a potential source of commercial energy generation has gained popularity due to decreasing solar PV panel cost, which is expected to further augment solar tracker market growth.

North America is expected to be the second-largest market for solar trackers during the forecast period owing to the transition toward a solar economy. Growing awareness of environmental ...

In 2023, Photovoltaic (PV) technology dominated the Solar Tracker Market, securing an impressive market share exceeding 86.7%. This technology plays a pivotal role in harnessing ...

Latest Industry Overview On Solar Tracking System Market At Eternity Insights, Market Research Reports, Size, Share, Growth, Trends, Demand, Company Profiles And Industry Analysis, ...

Solar trackers market analysis and forecast for 2020 to 2024 and future trends (2025 to 2035): Between 2020 to 2024, the solar trackers market is expected to grow rapidly ...

The global solar tracker market size was valued at USD 4.41 billion in 2022, and is projected to reach USD 29.31 billion by 2030, expanding at a CAGR of 26.2% from 2023 to 2030.

4 days ago; Note on market segmentation: Community solar projects are part of formal programs where multiple residential and non-residential customers can subscribe to the power produced ...

The Linear Actuators for Solar Tracking System market has emerged as a pivotal segment within the renewable energy sector, driven by a global shift towards sustainable energy solutions. ...

The solar tracker market is witnessing a shift toward advanced automation and AI-driven systems to optimize solar panel positioning. Dual-axis trackers are gaining traction for ...

Report Description Solar Tracker Market Outlook According to our latest research, the global solar tracker market size reached USD 9.2 billion in 2024, reflecting robust momentum in the ...

The global solar tracker market size was valued at USD 7.88 billion in 2023 and is projected to grow from USD 8.67 billion in 2024 to USD 25.24 billion by 2032, exhibiting a ...

Solar tracker market was valued at USD 50.1 billion in 2024 and is estimated to grow at a CAGR of over 8.5% from 2025 to 2034 driven by growing focus on utility scale projects.

Single Axis Solar Tracking System Market size is predicted to reach USD 11.29 billion by 2034 from USD 6.46 billion in 2026, registering a CAGR of 7.24%.

AI-driven tracking systems optimize panel positioning in real-time, increasing energy capture efficiency by approximately 10% to 15%. IoT-enabled monitoring solutions help ...

North America is expected to be the second-largest market for solar trackers during the forecast period owing to the transition toward a solar economy. ...

Global solar tracker market is projected to witness a CAGR of 15.02% during the forecast period 2025-2032, growing from USD 9.16 billion in 2024 to USD 28.06 billion in 2032.

With this 3rd edition of the TaiyangNews Market Survey on Solar Trackers, we extend our coverage to provide a comprehensive overview of important developments in the ...
