

Using lithium batteries for energy storage at home

Is lithium a good battery for a home?

These features make lithium ideal for homeowners who want full visibility and control over their energy usage. AGM batteries are a type of lead-acid battery known for: AGM batteries are often used in backup power systems, RVs, and off-grid cabins.

What is a lithium battery & how does it work?

Lithium batteries are rechargeable energy storage solutions that can be installed alone or paired with a solar energy system to store excess power. Standalone lithium-ion batteries can be charged directly from the grid to provide homeowners with backup power in case of a power outage.

Can a lithium ion battery save you money?

When paired with solar panels, excess solar energy can be stored in the battery and used later, like at night or during a power outage. Depending on the area, lithium ion batteries can even help save extra money on electricity bills. Let's take a closer look at what you need to know about lithium-ion batteries before getting one installed.

What are the benefits of lithium-ion home batteries?

Here are some of the benefits of lithium-ion home batteries: The DoD of a battery is the amount of the stored energy in the battery that has been used compared to the total capacity of the battery. Most batteries come with a recommended DoD to maintain their health. Lithium-ion solar batteries are deep cycle batteries, so they have DoDs around 95%.

Are lithium-ion batteries the future of home energy storage?

The adoption of lithium-ion batteries is accelerating as renewable energy becomes more prevalent. Among all lithium-ion types, LFP is expected to dominate the home energy storage market due to its safety, longevity, and scalability.

Can a lithium ion battery run with solar?

Pairing a battery with solar will give you the most bang for your buck, especially if you don't have access to net metering. The lithium battery can recharge with excess solar energy that is generated by your panels, so you can run your home entirely with solar even when the sun isn't shining.
