

What signal base station sites are there in West Asia

How many SIGINT stations are there in China?

The Chinese operate several dozen SIGINT ground stations deployed throughout China. They monitor signals from Russia, Taiwan, Japan, South Korea, India, and Southeast Asia. Signals from U.S. military units located in the region are of significant interest to these monitoring stations.

Which country has the most SIGINT capability in Asia/Pacific?

The Chinese maintain, by far, the most extensive SIGINT capability of any nation in the Asia/Pacific region. The Chinese operate several dozen SIGINT ground stations deployed throughout China. They monitor signals from Russia, Taiwan, Japan, South Korea, India, and Southeast Asia.

How many SIGINT stations are there?

With some 17 major SIGINT ground stations of various sorts and capabilities and at least 14 JMSDF ELINT stations, as well as extensive airborne and ship-based systems, it is probably the third or fourth largest SIGINT establishment in the world.

Why was the first satellite terminal used in a war zone?

Due to the sudden increase in demand for communications circuits between Saigon and Washington and poor H.F. radio propagation conditions at the time, the first satellite terminal to be used in a war zone was airlifted to Saigon on one-day's notice and was assigned to the Phu Lam facility.

What is a SIGINT Station?

Signals from U.S. military units located in the region are of significant interest to these monitoring stations. A large SIGINT facility at Hainan Island is principally concerned with monitoring U.S. naval activities in the South China Sea.

What did the 1st Signal Brigade do in Vietnam?

In the effort to reclaim the city of Hue alone, the 1st Signal Brigade lost twenty-two men killed in action, 160 wounded, and one missing. The role of the 1st Signal Brigade in Vietnam was long, complicated, and challenging. In all aspects, the brigade met those challenges.

OverviewGround platformsShip platformsSubmarine platformsAircraft platformsSatellite platformsSee alsoIt can be difficult to draw the line between a ground-based SIGINT receiving station, and facilities that have control, coordination, and processing functions in the "bigger picture" of signals intelligence. Many stations, for the countries with stations in many parts of the world, do have both aspects. There are also some that are clearly intercept only. The first signals intelligence platforms were listening stations on the ground. Early tactical statio...
