

Where to put the battery cabinet

How do you reinstall a battery cabinet?

Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.

How do you level a battery cabinet?

Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-level to ensure that the cabinet is level.

Where can you put a battery in a house?

The most likely battery locations are on an external house wall or in a garage. Batteries aren't allowed: near combustible materials. The standard requires clear space between the battery and any windows, doors and appliances such as hot water units and air conditioners.
